Zlatibor se nalazi u Zapadnoj Srbiji oko 230 km od Beograda i na pola puta od Beograda do Crne Gore. Centralni plato odlikuje prosečna nadmorska visina od 1000 metara okružena brojnim planinskim vrhovima: Tornik (1496m), Čigota (1422m), Gradina (1177m) i drugi. U blagotvorne činioce planine ubraja se čist i suv vazduh, nizak vazdušni pritisak i čuvena "ruža vetrova" koja uspeva da pomiri suprotstavljene vazdušne struje - planinsku i morsku i učini ih lekovitim. Medicinska istraživanja pokazuju da je ovo područje pogodno za lečenje različitih plućnih bolesti, anemije, neurastenije, poremećaja rada srca, malokrvnosti i štitaste žlezde. Sa preko 2000 sunčanih sati godišnje idealno je mesto za sve sportiste i rekreativce.
